Is your health system or clinical practice a member of
Better Health Partnership?

Then you are, too.

Clinical partner membership provides you access to more detailed information on current and historic achievement on evidence-based measures of quality care, as well as benchmarking to other practices in your health care system, your practice and your community. It's easy.

1. Click on the "Members Login"
2. Even if you previously have had a login and password, choose "Request Account." Complete the brief form, using the drop-down menus to select your health system and your practice. Better Health will review your request and notify you within 48 business hours about your account activation.
